SUMMARY

Senior Developer with 6 years of experience delivering cutting-edge and customer-defined applications with an eye for detail. Developed modern and responsive applications and enhanced system reliability by implementing comprehensive testing frameworks. Seeking a Senior Software Engineer role to drive impactful projects and optimize development processes using software development expertise.

EXPERIENCE

Senior Developer, Redwood Platform

Oracle

June 2022 - Present, Redwood City, CA

- Built Oracle's next-generation Approval Configuration tool from the ground up on the Oracle Redwood Platform across Oracle Fusion Applications.
- Delivered a modern, responsive, and customer-defined application by using Oracle's Redwood design system with JavaScript, HTML, and CSS.
- Integrate generative AI and embedded AI agents into the application to provide analysis and recommendations to the customers.
- Implemented automated testing frameworks and CI/CD pipeline using Mocha for unit tests and Selenium for E2E tests, increasing code coverage and reducing bugs, with TypeScript.
- Streamlined software development processes by using AI tools for code generation and code review.

Software Engineer

CGTech

June 2020 - June 2022, Irvine, CA

- Developed Windows desktop applications that simulates CNC machining to detect errors, potential collisions, or inefficiencies. Delivered software solution to meet the manufacturing needs of thousands of companies.
- Built and improved the backend system for machining simulation, data extrapolation, data management, and user experience using C++ in MS Visual Studio.
- Developed and maintained the frontend user interface of Vericut by introducing quality of life changes and troubleshooting issues for the customers using Java in Eclipse.
- Collaborated closely with Project Managers, Product Group, and customers to drive software releases.

Software Engineer Intern

UCSD Academic Services

April 2017 - September 2017, San Diego, CA

- Processed UCSD donation data using Cognos Analytics to increase the productivity of colleagues.
 - Extrapolated several hundred thousand lines of data to the end-user using JavaScript(ES6).
 - Analyzed and updated outdated code, reducing load times by up to 50% in most cases.
-

EDUCATION

Bachelor of Science in Computer Science

University of California, San Diego • San Diego, CA • 2020 • 3.79

- Member of IEEE-ETA Kappa Nu for my academic achievements
-

SKILLS

Programming Languages: JavaScript, TypeScript, HTML, CSS, C++, C, Java

Frameworks and Tools: Selenium, Mocha, Cline, Docker, Rancher, Node.js, GitHub

Concepts: Software Development, Agile Development, RESTful APIs, CI/CD
